CARBON SCHOOL FAIR PRIZE WINNERS IN ATHLETIC EVENTS

Running Broad Jump, Boys under 12. Wm. Waldron, Roseview, 1st; John Rogers, Carbon Intermediate, 2nd; and Francis Poxon, Carbon Intermediate, 3rd.

Running Broad Jump, Boys under 14. Harry Poxon 1st; Wilfred Tricker 2nd; William Peters 3rd.

Running Broad Jump, Boys Open—Harold Edwards 1st; Wilfred Poxon 2nd; Harry Poxon 3rd.

Running Hop, Step and Jump, Boys under 12—John Rogers 1st; Robert Wise 2nd; Henry Trumbley 3rd.

Running Hop, Step and Jump, Boys under 14—William Tricker 1st; William Peters 2nd; Norman Nash 3rd.

Running Hop, Step and Jump, Boys Open—Wilfred Poxon 1st; Harold Edwards 2nd; James Fairbairn 3rd.

50-Yard Dash, Boys under 8—George Moore 1st; Stewart Hunter 2nd; Harvey Barker 3rd.

50-Yard Dash, Girls under 8—Agnes Skerry 1st; Jean Skerry 2nd; Annie LeMay 3rd.

75-Yard Dash, Boys under 10—Francis Poxon 1st; Robert Wise 2nd; Cecil Trumbley 3rd.

75-Yard Dash, Girls under 10—Ivone Tricker 1st; Milly Hunt 2nd; Doris Gaulatz 3rd.

100-Yard Dash, Boys under 12—John Rogers 1st; Wilfred White 2nd; Chas. Gordon 3rd.

100-Yard Dash, Girls under 12—Hilda Luft 1st; Leona Gervais 2nd; Betty Johnson 3rd.

100-Yard Dash, Boys Open—Wilfred Poxon 1st; Harold Edwards 2nd; Harry Poxon 3rd.

100-Yard Dash, Girls Open—Hilda Luft 1st; Edith Bell 2nd; Hazel Hunt 3rd.

Relay Race for Schools—Roseview, 1st; Carbon 2nd; Avondale 3rd.

Wheelbarrow Race, Boys under 12—James Hunt and Henry Trumbley 1st; Ole Gardner and William Waldron 2nd; Cecil Trumbley and John Rogers 3rd.

Wheelbarrow Race, Boys Open class, Harold Edwards and Wilfred Poxon, 1st; David Gleck and James Fairbairn 2nd; Ned Fuller and Herbert Congo 3rd.

Sack Race, Boys under 12—Henry Trumbley 1st; James Hunt 2nd; John Rogers 3rd.

Sack Race, Boys Open—Harold Edwards 1st; Wilfred Poxon 2nd; Harry Poxon 3rd.

Jockey Race, Boys under 12—Wilfred White and Herbert Congo 1st; Henry Trumbley and James Hunt 2nd; John Rogers and Sidney Bramley 3rd.

Jockey Race, Boys open—Wilfred Poxon and Harold Edwards 1st; Harry Poxon and William McGregor 2nd; David Gleck and William Downe 3rd.

Three-Legged Race, boys under 12—Wilfred White and Herbert Congo 1st; Henry Trumbley and James Hunt 2nd; William Gibson and Charles Gordon 3rd.

Three Legged Race, Boys Open—Harold Edwards and Wilfred Poxon 1st; Ned Filler and Edward Moodie 2nd; Wilfred Skerry and Gordon Ramsay 3rd.

Three-Legged Race, Girls open class. Hazel Hunt and Ellen Trumbley 1st; Molly Laing and Leona Gervais 2nd; Alena Jewell and Margaret Tabert 3rd.

Potato Race, Boys—Ned Fuller 1st; Wilfred Poxon 2nd; Edward Moodie 3rd.

Potato Race, Girls—Edna Gibson 1st; Hazel Hunt 2nd; Leona Gervais 3rd.

Three-Legged Race, Girls—Edna Gibson and Florence Gibson 1st; Leona Gervais and Katherine Bell 2nd; Frances MacDonald and Charlotte Moodie 3rd.

(Continued Next Week)

MORE INDUSTRIES FOR CANADA

That the British Manufacturer must establish Canadian Branch factories if he desires to secure a permanent market for his goods in the Dominion was stated by T. A. Hooker, Industrial Agent of the Canadian National Railways with headquarters at London, England. At those factories either the finishing work on British-made goods would be done or the complete article manufactured according to Canadian

POLICE COURT NEWS

Three cases have come before W. A. Braisher, J. P., during the past week. The first was that of J. Stevenson, charge with beating his wife and after hearing the evidence accused was sentenced to two months hard labor.

Pete Glawski was also fined \$100 and costs on a charge of keeping liquor for sale. The defendant pleaded guilty and both fine and costs were paid.

The other case is not reported.

The above cases were heard by W. A. Braisher and information on the two liquor cases was supplied by Const. J. Jones of the Alberta Provincial police.

TOWN PLANNING IN ALBERTA

(By Horace L. Seymour)

Being a series of short articles explanatory of the provisions of The Alberta Town Planning Act and Regulations thereunder.

ARTICLE 3

Disposal of Lands other than by Registered Plans

In the previous article the Regulations governing the subdivision of land were discussed.

After the registration of a subdivision there frequently occurred in the past the splitting up of registered lots by description, resulting in lots of too narrow width for desirable home occupation, or in an undesirable change of frontage. In many instances where a subdivision or townsite has been registered, there is also a tendency for the owner of adjoining lands to sell or lease (generally for the purpose of erecting dwellings) lots of from one-half acre up, but to do this by description without survey, and frequently by agreement of sale so that nothing is officially known of the transaction for some time. There has thus often arisen a very undesirable condition with buildings erected without reference to existing subdivision or development and often blocking further desirable development.

Section 43 of the Town Planning Act has been enacted to take care of the above and similar situations. No more than one dwelling is ordinarily legally permitted on any registered parcel (unless used exclusively for agricultural purposes) and new parcels of land cannot be loosely defined by description but only under authoritative approval on behalf of the Provincial Town Planning Board. Just what this legislation may mean to the future advantage of the Province can be best realized by a consideration of the many difficulties that have arisen where such provisions were not made effective or carried out in the past.

standards and design.

"Past experience has indicated," Mr. Hooker continued, "that the British manufacturer in a general way must adopt a new plan of merchandising if he is to build up a big export trade with Canada and it will be necessary for him either to produce or finish his article in a Canadian plant using Canadian workmen under Canadian management. Canadian distributing agencies should handle the goods, which must conform to Canadian ideal of style.

Mr. Hooker intimated that such a plan would no doubt involve time, but that the Canadian business man could assist in its development by co-operation with British manufacturers' representatives stationed in Canada.

After spending some time in Eastern Canada in study of opportunities in Canada for British industries, Mr. Hooker will continue his inspection of trade conditions in Western Canada.

Definition—A pedestrian is a man with a wife, daughter, two sons and a car.

BOY SCOUTS ELECT OFFICERS AT MEETING MONDAY NIGHT

The annual meeting of the Carbon Boy Scouts was held in the Elks hall on Monday night of this week and the report given showed a balance of \$7 in the treasury. The following officers were elected for the next term: Scoutmaster, Bruce Ramsay. Asst. Scoutmasters, Jas. Gilbert and Frank Emery.

Games instructor, Hugh MacDonald. The fees were set at 25c per month.

The first regular meeting of the organization will be held in the club rooms on Friday, September 19th at 7.30 p.m.

TENNIS NOTES

CARBON TENNIS CLUB HOLDS GOOD LOCAL TOURNAMENT

The Carbon Lawn Tennis Club held a very successful club tournament on the 14th of this month. The events were Men's Singles, Men's Doubles, Ladies' Doubles and Mixed Doubles. The Ladies' Singles had to be postponed until later in the week. All the other events were completed except the final of the Mixed Doubles, which will be played on September 17th, the competitors being L. Poxon and Miss K. Ramsay and W. Poxon and Miss Irene Nash.

The following are the results and scores in the various events.

Men's Singles, First round—W. Poxon defeated C. Poxon 6-4, 6-3. W. Edwards defeated J. Gilbert 7-5; 6-3. V. Hawkins defeated J. Spence 6-1; 5-6; 6-2.

Semi-finals—W. Edwards defeated W. Poxon 6-0; 6-1. B. Ramsay defeated V. Hawkins 6-1; 6-1.

In the final match W. Edwards defeated B. Ramsay 6-3; 6-4.

Men's Doubles—J. Spence and Bruce Ramsay defeated J. M. MacDonald and H. C. Willson 6-4; 3-6; 8-6. J. Gilbert and V. Hawkins defeated W. Edwards and W. Braisher 6-1; 6-3. W. Poxon and C. Poxon defeated Len Poxon and J. Fairbairn 3-6; 6-4; 6-1. H. Jealous and G. Ramsay a bye.

Semi-finals—J. Spence and B. Ramsay defeated J. Gilbert and V. Hawkins 2-6; 6-4; 7-5. W. Poxon and C. Poxon defeated H. Jealous and G. Ramsay 6-3; 6-4.

In the finals of this match B. Ramsay and J. Spence defeated W. Poxon and C. Poxon 6-0; 6-5.

Mixed Doubles, First round—L. Poxon and Miss K. Ramsay defeated V. Hawkins and Miss R. Ramsay 6-3; 6-4. The following received byes: J. Gilbert and Miss N. Hemming; J. M. MacDonald and Mrs. Willson; J. Spence and Miss D. Nash; H. Jealous and Mrs. Peters; W. Braisher and Miss L. McEwan; W. Poxon and Miss Irene Nash; H. Willson and Miss E. Braisher.

Second Round—J. MacDonald and Mrs. Willson defeated J. Gilbert and Miss Hemming 6-3; 6-3. L. Poxon and Miss K. Ramsay defeated J. Spence and Miss D. Nash 6-3; 6-1. H. Jealous and Mrs. Peters defeated W. Braisher and Miss McEwan 6-3; 6-4. W. Poxon and Miss I. Nash defeated H. Willson and Miss Braisher 2-6; 6-1; 6-1.

Semi-Finals—L. Poxon and Miss K. Ramsay defeated J. MacDonald and Mrs. Willson 6-2; 6-2. W. Poxon and Miss Irene Nash defeated H. Jealous and Mrs. Peters 5-6; 6-4; 9-7.

The final has not yet been played.

Ladies' Doubles—Mrs. Peters and Mrs. Willson defeated Miss Braisher and Miss I. Nash 4-6; 6-4; 9-7. Miss K. Ramsay and Miss D. Nash a bye.

In the final match Mrs. Peters and Mrs. Willson defeated Miss K. Ramsay and Miss D. Nash 6-2; 3-6; 7-5.

INTER TOWN TENNIS MATCH AT CARBON

The Carbon Lawn Tennis Club are expecting a visit from Hesketh club on September 21st, when the following events will be played: Two Men's Singles; Two Men's Doubles; Ladies' Singles; Ladies' Doubles; Mixed Doubles. Hesketh won by four events to three at their last visit to Carbon so a very keen match is expected.

A visit is expected from Three Hills club at Carbon on the 28th.

SAD DEATH OF MRS. JOHN McEWAN

Word was received in Carbon on Wednesday morning last that Mrs. McEwan had died in the Drumheller hospital on Tuesday, September 9th, in childbirth. The late Mrs. McEwan who is survived by her husband, John McEwan, and by three young children, all of Hesketh, was born in Scotland 42 years ago, and had been in Canada 11 years. For the past nine years she had resided on the Pope Lease near Beveridge Lake school. She is survived by a brother at Lethbridge and a sister in Manitoba.

Funeral services were conducted Friday morning at 10:00 o'clock in the Carbon Roman Catholic Church with the Rev. Father Killan, of Rockyford, officiating.

Winter Bros. Funeral Home at Drumheller had charge of the funeral arrangements and interment was made in the Carbon cemetery.

MRS. TINLIN DIES IN AUTO CRASH

Proceeding to Beiseker to visit their mother after attending the funeral of Mrs. John McEwan at Carbon last Friday morning, one woman was killed and the driver badly shaken up when their light delivery truck left the road and overturned near Beiseker. Mrs. M. Tinlin, the passenger, was killed instantly.

Mrs. Tinlin accompanied Mrs. M. Steele, both of the Pope Lease near Carbon, in a light delivery truck from Drumheller to Carbon Friday morning. After lunch they proceeded south on the main trail to Beiseker intending to visit their mother in Beiseker. Half a mile East of Beiseker, about 2:30 o'clock Friday, the car suddenly crashed over the bank of the road and upset in the ditch. Mrs. Tinlin was pinned to the ground, parts of the car falling across her chest and throat, suffocating her.

Mrs. Steele was unable to move until a small girl, walking down the road, came to her assistance and opened the door, allowing her to crawl out. She was badly shaken up and bruised

WAYNE GOLFERS TO VISIT CARBON CLUB ON SUNDAY

About a dozen members of the Wayne Golf Club are expected here next Sunday to play in competition with the Carbon boys. Included in the Wayne visitors will be two or three lady players and it is to be hoped that they will find competition from the lady members of the Carbon club. The players will arrive in Carbon at 12.30 and be ready to play at 1 p.m. so all players are asked to be on the course by 1:00 p.m. at the latest. A full turnout is requested.

FAVORABLE REPORT CARBON OIL FIELD

Edward Hodgson, English geologist, was out from Calgary for a few days last week and went over the land held by the Carbon Exploration Company. Remarkable reports were given to the members of the company and should these reports be correct Carbon will have one of the greatest crude oil fields in its vicinity. Future development plans are being discussed by the directors.

WHEAT CROP IS EIGHTY MILLION BUSHELS MORE

Canada's wheat crop is estimated at 384,769,000 bushels, of which 362,000,000 bushels will be garnered in the three prairie provinces, according to a forecast made public last week by the Dominion Bureau of statistics, Canadian press dispatches state.

"The crop has been favored by relative freedom from frost damage and by almost ideal weather for harvesting," the report declared. "The short straw and the extended use of combines have also aided the dry season to establish a very high record for earliness and volume of grain marketed in the month of August. Inspectors to date show the quality to be even better than last year.

about the face and head and was given medical attention at Beiseker.

Dr. W. J. Fowler, coroner, of Acme, was summoned and decided that an inquest was not necessary.

Relatives of the deceased were notified of the accident immediately.

THE HUNTING SEASON IS OPEN.

Economic Unity Of The Empire

Within a few days the Imperial Economic Conference will be convened in London, England, and representatives of the British Government will sit down at the conference table with representatives of the self-governing Dominions and discuss matters of mutual concern to all members of the British Commonwealth of Nations.

It will be a momentous, an epoch-marking event in the history of the Empire. There have been Imperial Conferences in the past, but they have had to do with constitutional and political aspects of our Empire relationships. For the first time serious consideration is to be given to the economics, the trade and commerce of the Empire as a unit, and to the future lines of policy to be followed by each British nation in its trade relations with the Motherland and the other Dominions on the one hand, and with the rest of the world on the other hand.

The Conference, therefore, will make history, and exert a profound influence on the future of each of the self-governing Dominions, the British Isles, the widely-scattered British colonies, in a word, the whole Empire, while at the same time its decisions will inevitably create a reaction in, and affect the policies of all other nations. A nation can no longer live unto itself alone. The adoption of any given policy by one of the major nations of the world in the present advanced state of our world civilization affects all other nations. They must take cognizance of it and govern themselves accordingly. And if this is true of the action of any one nation, it is immeasurably more true of a great union of nations comprising one-quarter of the earth's surface and more than one-quarter of the world's population.

The forthcoming Imperial Economic Conference is fraught, therefore, with great good or ill for the Empire. Today while politically and sentimentally one, it is divided economically, each individual self-governing unit treating each other in matters of trade much the same as they do foreign countries, and each coping singly with great economic problems which through joint action they might be able to solve.

The first question for the approaching Conference to consider and decide is: Shall this condition continue? Can it continue with safety to the future of the Empire? The Empire was created by conquest and built up by trade. The day has passed when Great Britain can dominate the trade of the world. Entirely new world conditions have developed, particularly during and since the Great War. As a result Britain has lost much of her world trade and economic and financial predominance. The whole world has become industrialized. Single handed Britain cannot hope to regain her lost leadership in trade and commerce, but cannot she do so in co-operation with the Dominions? Will political and sentimental ties hold the Empire together if its component parts are bitter rivals in trade, giving advantages to foreign countries, regardless of the welfare of sister British nations, solely because it seems beneficial to the individual units to do so?

These are matters for the consideration not only of Britain but for all of the Dominions as well. They transcend party politics everywhere. It is the future of the Empire that is at stake.

Assuming the decision of the Imperial Economic Conference to be that such a condition cannot continue; that they must unite upon economic lines as well as upon political lines; the next step is to find common ground of action. Admittedly it is in connection with the working out of details of policy that definite, concrete problems of opposing and conflicting interests will arise. They cannot all be solved at once, but a very real start can be made along lines of least resistance, leaving the future, in the light of actual experience, to further extend and develop the agreed upon policy as circumstances may dictate to be of mutual advantage.

A recent newspaper despatch from Ottawa intimated that the West was not greatly interested in the outcome of the Imperial Economic Conference. No greater misconception could possibly exist. The West is vitally interested. To a greater extent, perhaps, than any other part of Canada, its future is wrapped up in a successful outcome to the approaching deliberations in London. In no part of the Empire will the people evince a greater interest, possibly even anxiety, than on the prairies of this Dominion.

Making Sure Of Good Seed

The Ontario Department of Agriculture is taking time by the forelock in so far as making preparation for the World's Grain Exhibition and Conference, at Regina, in 1932, is concerned. Farmers are being urged by the department to keep this year's seed in the event of the crop of next year not being up to the high standard of former years.

What's In A Name

Winnie Chicken and Bert Bird, of London, England, have announced their engagement, which brings back memories of another London affair, a little while ago when Archie Rook was married to Carrie Swan, with Rev. James Crow officiating as clergyman. The couple were driven to their home, which they called "The Nest," by Robert Starling.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Honeymooners Take To Air

Journey By Train Or Ship Is Considered Old-Fashioned

Honeymoons by anything so common-place as a train or ship are now "frightfully old-fashioned" says the London Daily Mail. A journey to Paris by air is the only fitting beginning of a modern wedding tour. A Croydon official says that honeymoon couples are departing and arriving almost daily. Brides are arriving from church still in their wedding gowns and veils, blushing as they are pelted with confetti while boarding a plane, which is usually decorated with flowers, but nobody has yet attempted to tie a lucky shoe to the tailskid.

Do You Value Your Health?

If your health is poor; if you are pale, nervous and easily tired; if you suffer from headaches and backaches; if your digestion is bad you may depend upon it that these symptoms come from an impoverished state of the blood. That unless this condition is remedied a complete breakdown may follow. Dr. Williams' Pink Pills are a perfect medicine for any one in this condition. They enrich and purify the blood and thus promote health and strength.

Mrs. G. M. Andrews, Halifax, N.S., writes:—"I always keep Dr. Williams' Pink Pills in the house. When I was a young, anaemic girl they completely restored my health. After marriage my health broke down and once more these pills brought me back to health. My friends all tell me how well I look and for this Dr. Williams' Pink Pills deserve all credit."

You can get these pills at all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Useful To Motorist

Recent Invention Shows Driver When Headlight Not Burning

It is often difficult and sometimes impossible to tell from the driver's seat whether both headlamps are lighted. Dr. W. Kennedy Fenton, Toronto, has invented a simple, yet effective and attractive little gadget that is readily attachable to headlamps and constantly reveals to the driver whether the lamps are lit or not. They are small reflectors in various designs which fasten to the headlight rims, they are luminous at night and visible from the driver's seat.

Asthma Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Predicts Speedy "Flying Subs"

Will Cruise Eight Miles Above Earth Says Edward Warner

"Flying submarines," to cruise at 250 miles an hour eight miles above the earth, were predicted by Edward B. Warner, president of the Society of Automotive Engineers.

Cruising speeds of 100 to 250 miles an hour were sufficient for present needs, he declared, except in certain parts of the west and north, where travellers wish to fly 1,500 miles between dawn and sunset. When more speed is demanded the "submarine" and the "rocket plane," long a dream of Glen Curtiss, would be developed, Warner said.

Africa Interested In Grain Show

Evidence that competitive exhibits from far off Transvaal, South Africa, will be received for entry in the World's Grain Exhibition and Conference at Regina, 1932, is found in a request to the office of the exhibition for a number of tags for attaching to exhibits. The Hartbeespoort Experiment Station at Brits, Transvaal, is also anxious to receive special information regarding the exhibition of corn.

The greatest mistake we can make in life, is continually to be fearing that we shall make one. Never explain. Your friends do not need it, and your enemies will not believe you.

Use Minard's Liniment for Foot Ailments.

Her Three Children Troubled With Diarrhoea

Mrs. Leo Lapointe, Laurier, Man., writes:—"My three youngest children were very bad with diarrhoea. I tried all kinds of remedies, until a kind old lady told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle right away and started giving it to them, and the next day the diarrhoea had stopped altogether. Now I will know what to do when any of my children are troubled that way again."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Rural School Supervision

New Plan Of Rural School Improvement Inaugurated In Saskatchewan

Announcement was made recently by Premier J. T. M. Anderson, Minister of Education, of the appointment of the first rural school supervisor for Saskatchewan, under the new plan of rural school improvement being put into effect by the Department of Education.

Miss Mary Isabella Grant, of Cabri, Sask., is the first supervisor to be appointed by the Public Service Commission and will assume her duties immediately in the new experimental supervisory school area in the neighborhood of Kindersley and Glidden, Sask.

The appointment of rural supervisors, according to the premier, is being made in accordance with numerous requests from school trustees and ratepayers throughout the province who wish to co-operate with the Department of Education in a plan to provide closer supervision of rural school education.

The Minister of Education believes that the experiment will do much towards solving the many problems of Saskatchewan's rural school education.

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Despite the cold and long sunless periods in the Arctic Zone, about 2,000 specimens of plant life have been discovered there, among them willows, junipers, ferns, mosses and numerous flowering plants.

Inhale Minard's Liniment for Asthma.

Commercial fruit production last year in Canada had a value of \$19,591,240, of which Ontario accounted for \$8,656,097; British Columbia, \$6,766,550; Nova Scotia, \$2,830,088; Quebec, \$1,145,846, and New Brunswick, \$192,659.

Detect Sounds In Water

Ultra-Sonic Beams Permit Secret Communication Between Ships

Secret communication between ships by means of ultra-sonic beams projected through water was suggested as a future development of radiation by Dr. R. W. Boyle, of the national research laboratory at Ottawa, who addressed the fifth annual convention of the Institute of Radio Engineers in the physics building of the University of Toronto.

Ultra-sonics, or sounds that have too short a wave-length to reach the human ear, have been used with success in the detection of submerged objects, Dr. Boyle explained, and he believed that future development of their use would open up a new means of communication.

Showing sketches of ships provided with projectors of these beams, fixed to their hulls below the water line, he suggested that beams might be interchanged between ships and their radiations utilized by means of code to send and receive messages.

Icebergs may be detected in deep water more successfully by these beams than is usually recognized, he said.

Steel hulls, or submarines could be detected with accuracy when at a distance of four miles, he said, and land could be detected when six miles away.

Perfect dyeing so easily done!

DIAMOND DYES contain the highest quality anilines money can buy! That's why they give such true, bright, new colors to dresses, drapes, lingerie.

The anilines in Diamond Dyes make them so easy to use. No spotting or streaking. Just clear, even colors, that hold through wear and washing.

Diamond Dyes never give things that re-dyed look. They are just 15c at all drug stores. When perfect dyeing costs no more—is so easy—why experiment with makeshifts?

FEDERAL PLAN TO PROVIDE WORK FOR UNEMPLOYED

Ottawa. — "Work, not charity" — this is the basis upon which the government is proceeding in its effort to deal with the unemployment problem. Thus declared Hon. R. B. Bennett, Prime Minister, in the House of Commons.

Before the House in committee, the Premier explained the government's proposals for spending the \$20,000,000 which he is asking parliament to vote. These include building of public works, such as wharves, bridges, etc., which are national undertakings but which would not of necessity have been started immediately except to relieve the present situation.

It is proposed to assist the provinces in connecting up the unfinished portions of the trans-Canada highway, and in this connection the prime minister suggested that assistance might also be given out of the Federal treasury for the maintenance of highways connecting provinces.

The railway companies have been asked to inform the government what works they can undertake. Mr. Bennett stated, and assistance would be decided upon in relation to the cost of such undertakings. The question of the Peace River outlet will be left over, he said, until the next session of parliament, which would be called soon after the new year.

The Dominion government will deal directly with the provinces in its assistance to public works of a provincial or municipal nature, and also in granting one-third of the amount expended in cases where municipalities have to provide relief other than that of giving employment.

The amendments to the customs act respecting dumping are expected to relieve considerably the unemployment situation by giving employment in a few weeks, Mr. Bennett hoped, to some 25,000 men now out of work.

Information received from the various provinces of Canada indicates that there are now 117,000 people out of work in the Dominion. There is a prospect that this number may be increased to 177,000 during the coming winter.

Mr. Bennett gave the above figures indicative of the scope of the unemployment problem in the Dominion.

Wheat Crop Estimate

Federal Government Forecast Of Wheat Crop Is 384,769,000 Bushels

Ottawa, Ont.—Canada's wheat crop is estimated at 384,769,000 bushels, of which 362,000,000 bushels will be garnered in the three prairie provinces. This is the forecast made public recently by the Dominion Bureau of Statistics based on reports filed in on or about August 31.

Of the above total for all Canada 364,481,000 bushels is spring wheat. Last year's spring wheat crop totalled 284,016,000 bushels and the entire wheat crop was 304,520,000 bushels. "The western wheat crop," the report states, "is very spotty and thus difficult to estimate because of a series of depreciating weather effects from seeding until harvest."

"The crop has been favored by relative freedom from frost damage and by almost ideal weather for harvesting," the report declared. "The short straw and the extended use of combines have also aided the dry season to establish a new high record for earliness and volume of grain marketed in the month of August. Inspections to date show the quality to be even above that of last year."

Starving Boys Steal Biscuits

Montreal, Que.—Unable to buy food, three boys took three boxes of soda biscuits from a local grocery store. They were arrested and turned over to the juvenile court. The youths told police they had not had a proper meal for a month and were starving. A visit to their homes showed squalor and starvation.

Italy is giving government aid to aeronautics.

Fast Automobile Journey

From Toronto To Vancouver In 95 Hours and 15 Minutes

Vancouver, B.C.—From Toronto to Vancouver by automobile in 95 hours and 15 minutes is the record achieved by two youths of Oakville, Ont. The fastest train scheduled takes 85 hours to do the same journey.

Dick Henry and Vernon Dynes left Toronto Thursday, at 11 p.m., and arrived here, Monday night, at 6:30 o'clock. They proceeded from Toronto to Sault Ste. Marie, thence across United States territory to Emerson, Man., from there they followed the main prairie roads to Crow's Nest Pass, through the Rockies to Vancouver.

May Return To Public Life

Rumor That Hon. C. A. Dunning Will Continue In Politics

Ottawa, Ont.—The return to public life of Hon. C. A. Dunning, former Minister of Finance, who was defeated in Regina, is still regarded as very much of a possibility.

It is suggested that Rt. Hon. W. L. Mackenzie King, opposition leader, had Mr. Dunning in mind when he made his reference to familiar figures who were absent from the Commons, during his speech on the address from the throne.

Mr. Dunning was one of the most prominent debaters in the Liberal ranks during the last parliament.

Girl Swims English Channel

Nineteen-Year-Old Maid From Africa Performs Difficult Feat

Dover, England. — Nineteen-year-old Peggy Duncan, South African girl swimmer, ranked among the few mermaids who have made the difficult swim across the English Channel, although she was balked in her purpose of beating Gertrude Ederle's time in accomplishing the feat.

Miss Duncan, who weighs 200 pounds, landed at South Foreland, England, after swimming from Cape Gris Nez, France, in 16 hours and 15 minutes. Miss Ederle's record is 14 hours and 25 minutes.

Steamship Breaks Record

"Empress Of Japan" Makes Fast Crossing Victoria To Honolulu

Honolulu. — Breaking all records from Victoria, B.C., to Honolulu, the Canadian Pacific steamship "Empress of Japan," arrived here in four days fifteen hours and fifty minutes for the 2,329 miles.

On her maiden voyage, the liner lowered the record between Yokohama, Japan, and Victoria to eight days, six hours and twenty-seven minutes, August 22. This trans-Pacific record had stood for seven years.

Totem Pole For President Hoover

Baltimore. — Another gift is on its way for President Hoover's collection. It is a totem pole about a foot high, carved from a walrus tusk to be presented to him when he arrives to review the parade of the Veterans of Foreign Wars. The totem pole is the gift of Denali Post, Anchorage, Alaska.

Nurses Have Eight Hour Day

Ottawa, Ont.—As a measure towards relief of unemployment the board of trustees of Ottawa Civic hospital have decided to provide an eight-hour working day for nurses on the staff. Three shifts of nurses will now be employed daily in place of the present double shift of 12 hours each.

Ogopogo Still Lives

Hamilton, Ont. — Prompt action by Vernon, B.C., in broadcasting denials that Ogopogo had died a violent death, met with reward recently when the Union of Canadian municipalities voted to meet next year at the sea serpent city. Vernon delegates promised a sight of Ogopogo, and the vote was unanimous.

Graf Zeppelin Visits Russia

Moscow, Russia. — The Graf Zeppelin paid her first official visit to the Soviet capital, and was greeted when she landed at October field with red flags flying and bands playing proletarian airs. After a brief visit she returned to Germany again. Dr. Hugo Eckener was greeted by high Russian air officials.

MISSIONARY FROM NORTH

Rev. L. E. Atkinson, eight years a missionary among the northern Crees at Oxford House, Man., a post one week's travel beyond the north end of Lake Winnipeg, is one of the commissioners elected to the general council of the United Church of Canada, meeting in London, Ont., in mid-September. He was born near Stouffville, Ont., and attended Victoria College, Toronto.

A Golf Marvel

Consecutive Hole-In-One Title Is Received By Married Couple

Saskatoon, Sask.—Up at the little town of Waldron in northeast Saskatchewan, R. L. Penny and his wife lay claim to the consecutive hole-in-one title for married couples.

Mr. Penny slapped a drive from the fifth tee on the Stella course and gasped as he saw the golf ball roll into the cup. His chest was still expanding as his wife brushed him aside and teed up her ball. A swing, a smack, and the white sphere bounded toward the pin, rolled about the rim of the cup—and dropped in beside its mate.

Mr. Penny says imitation is flattery's sincerest form. Mrs. Penny claims the female of the species is as deadly on the drive—as the male.

Wheat From Russia

Cargo Of Russian Wheat Is Received In Scotland

London, England.—The first example of Russia's wheat export campaign is the arrival of 7,000 quarters (a quarter equals eight bushels) of Russian wheat at Leith, in Scotland, for the Scottish Co-Operative Wholesale Society.

This is said to be the first Russian consignment to Scotland since the war, and it was made in spite of the reported stringent food shortage in Russia.

Sixty Bushels To Acre

Lancaster, Sask.—The biggest crop in this district was threshed on Mrs. F. E. Spence's farm three miles northwest of town, the average for the field being 60 bushels of wheat to the acre.

"Miracle" Heroine Here.

Lady Diana Manners, famous English society beauty and equally famous heroine of "The Miracle," during its New York and Boston productions, photographed with her husband, Captain Alfred Duff Cooper, D.S.O. (left), Viscount Ednam and his son William Ward, at Windsor Street Station, Montreal, on her first visit to Canada. The party are on an extended trip through Canada, as far as Vancouver, with a long stay at the Nipigon Bungalow Camp. Lady Diana thought the talkies would not oust the legitimate stage and observed "people still appear to be building ordinary theatres."

Canadian Ace Killed

Captain Dickie Meets Death In Accident Near Fort William

Fort William, Ont.—Captain James A. Dickie, Canadian war flier, died when his plane swooped earthward and crumpled its nose in the rough forest land ten miles from the outskirts of Fort William. Eighteen-year-old Marion Swain, who was flying with Capt. Dickie at the time of the crash, lies in hospital here in a critical condition.

Cause of the accident, witnessed by only a few persons, could not immediately be determined. It is believed that the Gypsy Moth, a machine familiar to the war ace, swung into spin from which it could not be extricated. Position of the passengers in the debris did not indicate to rescuers which one was piloting the plane when the accident occurred. Miss Swain recently obtained her student pilot's license.

Capt. Dickie, only recently named secretary of the Flying Clubs Association of Canada, was well-known among Canadian airmen. He had previously been instructor of the Fort William Flying Club. Formerly a resident of Winnipeg, he came to the lake head six years ago and operated a drug store in Fort William. Only a few months ago he was married to Miss J. Burnett, of Fort William.

Colleges For Firemen

Future Fire Fighters Will Be Specially Trained In Profession

Winnipeg, Man.—Firemen of the future will be graduates of fire colleges where they will receive highly-specialized training in all phases of their profession, Chief Ralph J. Scott, president of the International Association of Fire Chiefs, declared before the first business session of the Fire Chiefs' convention here.

He said that during the past year he had devoted every effort to furthering the idea of the fire college endorsed by the international convention when it met last year at Birmingham, Ala. Officers of the Los Angeles, Cal., Fire College—first of its kind to be organized—explained methods of instruction at the school.

Cut-Off May Be Included

Appropriation For Winnipeg's Short Route To Bay Railway Expected

Ottawa, Ont.—Provision towards the construction of the proposed Mafeking cut-off in Manitoba to the Hudson Bay Railway will probably be included in the \$20,000,000 expenditure proposed by the government on national undertakings.

It is understood that work on the short route from Winnipeg to the Hudson Bay Railway will start this fall.

Increased Population

Toronto, Ont.—The population of Toronto has increased 15,226 within the last year according to the assessment commissioners report. The total population of Toronto is 621,596.

UNITED STATES MOVES TO HALT IMMIGRATION

Washington, D.C.—The state department has announced that in carrying out President Hoover's wishes for more strict application of the immigration laws to aid unemployment; conferences will be held at Winnipeg and Vancouver, in addition to three consular conferences overseas.

The Canadian conferences are set for this week and another date early in October. Foreign Service Inspector Monnett B. Davis has been designated to attend the conferences in the Dominion.

A conference at London, England, September 22 and 23 will draw the consular officers in England, Ireland and nearby points on the continent. Officers from France, Germany, Switzerland, Austria, Sweden, Italy, Czechoslovakia and Yugoslavia will meet at Stuttgart, Germany, September 26 and 27.

A third conference for the consular officers in Poland, Finland and Latvia, completing the plans for all large immigration centres in Europe, will be held October 1 and 2, at Warsaw.

Under the president's plan, immigrants to the United States must show they will not become public charges. At present, aliens entering the country with position previously contracted for, are denied entry under the alien contract labor law.

Ottawa, Ont.—Announcement from Washington that more stringent measures are in contemplation in regard to migration to the United States was received here recently without any great degree of surprise. Unemployment in the country to the south has frequently been stated to be considerably worse than in Canada, and it was expected that steps might be taken to curtail the movement in that country.

It is generally accepted, however, that the present emigration from Canada across the border is not great enough to cause apprehension in Washington.

Bootlegging Of Grain

Manitoba Pool Takes Steps To Stop Practice

Winnipeg, Man.—A determined attempt to prevent the "bootlegging" of grain by wheat pool members was started recently when eleven interim injunctions against farmers were sought by the Manitoba Wheat Pool before Mr. Justice Donoyan in chambers.

Sale of grain by pool members to non-pool purchasers is a breach of the organization's five-year contract, and constitutes what the trade calls "bootlegging."

Grain Exports From Vancouver Higher

August Shipments Reported To Be Higher Than Any Recorded

Vancouver, B.C.—Grain exported from Vancouver during the month of August totalled 2,933,519 bushels, almost 600,000 bushels more than was exported in August, 1928, when grain shipments reached a peak of 95,000,000 bushels from this port.

Last month export to the Orient totalled 559,732 bushels, compared with 680,221 bushels in August two years ago.

Timber Cutting Stopped

Ottawa, Ont.—On the request of the Premier of Saskatchewan, Hon. Thomas G. Murphy, Dominion Minister of Interior, has ordered no more licenses or permits to cut railway ties, pulpwood and other timber be granted in the province of Saskatchewan, prior to October 1, next. It is on that date that the province takes over administration of its natural resources.

May Give Up Flying

London, England.—The Daily Herald says that Wing Commander Charles Kingsford-Smith, Australian aviator who recently flew from Europe to the United States, has abandoned his plan for a homeward flight to Australia, and has quit flying entirely, on physician's order.

EDOUARD J. ROULEAU,
Editor and Publisher

A SWEET TOPIC

The following editorial appeared in
last week's issue of The Drumheller
Mail:

The suggestion of Mr. Jesse Gouge
that farmers of the district should ex-
periment with sugar beet production is
a timely one when the average wheat
grower is frantically looking around
for some means to make a livelihood.
Even in more prosperous times we
advocated diversified farming, but now,
with grain prices in the cellar and
slim crops in many sections, the ne-
cessity for the average farmer to turn
his attention to other side-lines is
only too apparent.

With wheat carry-overs, world-wide
industrial depression, and Russia ra-
pidly coming to the fore as a grain
producing nation, the farmer must
adopt some radical measure if he
wishes to enjoy a measure of pros-
perity when it appears around that
mythical corner.

**CAN'T BEAT SATURDAY NIGHT
GET-TOGETHER IN TOWN**

Despite general depression among
farmers, due to adverse weather con-
ditions, Saturday night in town still
is the high spot of the week. The
farmers for miles around come into
town to do their trading at the stores
and visit among their friends whom
they meet there.

Somehow there is nothing to com-
pare with the warmth of community
interest on this night. There is an
old fashioned neighborliness that ne-
ver will go out of date and that has
only been intensified by automobiles
that make the trip to town a pleasure
for every family.

At this time of the year few farm-
ers come to town in the afternoon,
but along towards sundown, shortly
after supper, the parking places along
the main street are crammed with
cars, and the side streets must be re-
sorted to for parking purposes. The
farmers are coming to town for their
week-end shopping, and their week
end relaxation from work in the field
or the dairy barns.

Following a custom of long standing,
the stores all stay open, that the lar-
der may be replenished for Sunday and
the first part of the week, or the dress
goods for Mary's new dress may be
picked out. The aisles are filled with
men, women and children.

Shopping is not the goal so much as
the exchange of greetings, the salu-
tation of friends seen after the lapse of
a few days, the interested sizing up
newcomers. This is the time for wo-
men to exchange their gossip, and for
men to speculate upon conditions of
the soil and the tendency of business.

Everyone in the town and nearby
territory seems to be there. Young
couples push baby carriages. Gay
young bloods pick out their girls for
the movies, who appreciate the fine
entertainment offered. Older heads
meet in a fraternity of friendships
which know no pretenses.

Along about 9.30 the farmers who
live at the greatest distance gather
their families and the autos begin to
leave. In another couple of hours the
streets are practically cleared. The
Sabbath morning will find them silent
and deserted.

The week-end foregathering has

been held. Affairs of state and nation,
as well as the problems of the indi-
vidual and the family, have been set-
tled. Everything is at normalcy—until
next Saturday night!

A SMILE COSTS NOTHING

A smile costs nothing, but gives
much. It enriches those who receive
without making poorer those who
give. It takes but a moment, but the
memory of it sometimes lasts forever.
None is so rich or so mighty that he
can get along without it, and none so
poor that he cannot be made rich by

it. A smile creates happiness in the
home, fosters good will in business,
and is the countersign of friendship. It
brings rest to the weary, cheer to the
discouraged, sunshine to the sad, and
is nature's best antidote for trouble.
Yet it cannot be bought, begged, bor-
rowed or stolen for it is something
that is of no value to anyone until it
is given away. Some people are too
tired to give you a smile. Give them
one of yours, as none needs a smile

so much as he who has no more to
give.

WHEAT—WHAT— AND WHY?

The following has been gleaned
from a recent issue of a financial pub-
lication: Wheat, it appears, is a seed
that is planted and grown to keep the
producer broke and the buyer crazy.
It is planted in the spring, mortgaged
in the summer and lost in the fall.

Its quality and quantity varies ac-
cording to the amount of rain or frost
experienced during the growing sea-
son. A man who can guess nearest
to this quality is called a wheat grader
by the public and a fool by the farmer.
The price of wheat is determined at
primary markets and goes down when
one has bought and up when one has
sold.

WHAT IS THE OBJECT OF AN EDUCATION

The following are some of the main reasons for an education:

A fuller appreciation of the more worthwhile things of life.

To teach the child to appreciate and

enjoy the worthwhile things of life.

To prepare the student to take advantage of his life's experiences.

Education—the art of drawing out;

The chief purpose of school education

is to bring out the best that is in the

child; therefore to build up the character.

acter.

To enable youth of today to train themselves physically and mentally for emergencies in life's problems and possibly find a type of occupation suitable to his abilities.

To make the child a happy, efficient broad-minded unit of society.

To enable the person to get the best out of life in a fair and honest way, especially as concerning his fellow beings.

To aid the child in choosing the vocation for which he is best suited; to train him in good citizenship.

The main purpose of Education should be to train the mind and body so a person should get along well in life and make a decent living.

The realization of one's capacity for the benefit of mankind, and the individual concerned.

To give the pupil an insight into the Basic Principles or into the facts which surround us in this life. Education is the study of facts.

SCIENCE AND INVENTION

A three-wheeled taxi motorcycle that carries five passengers in addition to its driver has been developed in Germany.

Modern German passenger liners are equipped with bowling alleys in which machinery automatically resets the pins, returns the balls and indicates the scores.

A shotgun, with one barrel on top of the other, has been designed by an inventor in Utah. The two barrels can be fired alternatively by a single trigger.

WHEAT POOL MEMBERS!

Why Menace Your Own Elevator System

BY DELIVERING YOUR WHEAT TO NON-POOL ELEVATORS?

No other elevator system can give the same fair treatment to one and all as can the Alberta Pool elevators.

Your own money to the extent of millions of dollars is invested in Alberta Pool elevators. By patronizing these elevators to the fullest extent you will safeguard this large investment.

Your loyal support and patronage of the Alberta Pool elevator system NOW means everything to your organization.

Soft copper is one of the ingredients of a new alloy that can be tempered as hard as steel for razor blades and shears.

The world's largest power belt has been built in California from rubber and cotton fabric. It is 42 inches wide and more than 1000 feet long.

Here and There

(606)
"We are quite satisfied with the showing of the British teams at the Empire Games just concluded at Hamilton Ont. for we picked up quite a lot of honors, and it may say so, made a very creditable showing," was the statement of R. T. Britten in charge of the swimmers who hung up several new marks at the meeting. He thought the Games would be of incalculable value to the Empire as a whole, since they brought all parts of it together at one time and one place.

The maiden voyage of the new Canadian Pacific flagship of the Pacific, the Empress of Japan, from Yokohama to Victoria, was completed in eight days, six hours and 23 minutes, beating the Empress of Canada record for the run, established in 1918, by four hours and thirty minutes. E. W. Beatty, chairman and president of the railway company, wired congratulations to Captain E. Alkman, general superintendent of the Company's Pacific steamship fleet. Records also fell on the Atlantic when the company's liner Duchess of York travelled between Greenock, Scotland, and Quebec City in 5 days, 17 hours and 20 minutes, even bettering the time hung up by the Duchess of Richmond on her previous trip from Belfast to Quebec, which is a hundred miles shorter.

Speaking at a banquet given by the Saint John Board of Trade to inaugurate the service of the new Canadian Pacific steamer Princess Helene, on the Saint John-Digby route, E. W. Beatty, chairman and president of the railway, said he thought Canada would respond more quickly than other countries, even wealthier than herself, to measures taken by responsible governments and large industrial organizations to alleviate unemployment. He added that in his opinion the Maritime Provinces were particularly favorably placed in this respect.

Dressed in white and blue kirtles and the traditional Normandy caps, fifty Louisiana girls, descendants of the Acadians expelled from Nova Scotia 175 years ago, assisted in the celebrations at Grand Pre recently, at which many Acadians living in the United States and Canada attended. The United States, France, Great Britain and Canada were represented at the celebrations which were held on the site of the old village and around the Memorial Church made ever famous by Longfellow's poem of Evangeline.

In the provision of telephone communications in cities of 60,000 and over and in conversations per capita, Canada leads the world, according to statistics recently published. In these cities Canada has 24.2 telephones per 100 inhabitants against the United States' 21.8. In 1929 Canadians made 241.1 conversations per head of population as compared with 230.7 in the United States, her nearest rival.

A total of 18,029,973 telegrams was transmitted and received in Canada in 1929, an increase of 1,172,753 over 1928. There are 360,883 miles of telegraph lines in Canada.

A Happy Quartette at Empire Games

It was a great day at Hamilton, Ont., when the British Empire Games were opened; a day of sunshine and smiles, as is shown by the above picture of four distinguished Canadian citizens in the vice-regal box. Whatever the smile is born of, it is unanimous. Left to right: E. W. Beatty, Chairman and President of the Canadian Pacific Railway; His Excellency Viscount Willingdon, Governor-General of Canada; Hon. R. B. Bennett, Prime Minister of the Dominion; and Hon. J. Howard Ferguson, Prime Minister of the Province of Ontario.

FRUIT-A-TIVES ENDED YEARS OF MISERY

W. N. U. 1855

New Device Demonstrated

Music Produced From Instrument Based On Radio Principles

By merely moving his hands before a plain looking cabinet, Lennington H. Shewell, a national broadcasting artist, created music of such amazing tone and beauty that radio engineers from all over America, who heard him, applauded enthusiastically.

It was the first public demonstration in Toronto of the Victor Therman, a musical instrument based on radio principles, which had been brought here for the annual banquet at the King Edward Hotel held in connection with the fifth annual and the first international convention of the Institute of Radio Engineers.

The music of the instrument had been heard by many before on national hook-ups over the air, but more novel than the actual music was the simplicity with which the young artist seemed to produce it. Standing before a silvery rod which extended above a plain wooden box, Mr. Shewell merely moved his hands back and forth to bring out the tones he desired. His right hand was used to bring out the melody, he explained later, and with his left hand he controlled volume, phrasing and expression.

The Therman is named after its creator, a Russian, who conceived the idea that in the "squeals" of radios was sound that could be utilized as music.

(By Eva A. Tingey)

SMALL DAUGHTER STYLES

When little daughter reaches a certain age, you may fancy she'll be better suited by a belted rather than a straight frock. Here is one which has both qualities. It can be worn either way, and is therefore as suitable a pattern for the little girl as her schoolgirl sister.

It is prettily yoked, has ample easily pressed box pleats, and long sleeves—a nice model for "back to school again."

Carried out in cotton it is of course easily laundered and can have the wee rick-rack edging as shown. In woolen materials the rick-rack can be sewn on to a tape and made removable.

This trim is a childish way of adding a white touch as pique serves for grownups.

This pattern may be obtained in sizes 8 to 14. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

PILE PAIN

Ends in 1 Minute
"Raded burn, itch and pain of piles in 1 minute with 'Sootha-Salva,'" writes L. T. Sears. "Bleeding stopped. Piles soon vanished. Avoided operation." Get instant results today. All druggists.

Not Cramped For Space

Accommodation On R-100 More Commodious Than On Trains

When the British air liner R-100 was over Ottawa, it was difficult to realize that the ship's weight in the air is actually over 150 tons. In length R-100 is larger than any of the ocean liners that sail out of Montreal. The airdrome to house R-100 would have to be larger than any city block in Ottawa.

Passengers on the air liner have cabins as commodious as the cabins on ocean liners. They are larger than the compartments in Pullman sleeping cars. There is more room on the promenade decks of R-100 than in the observation cars of transcontinental trains. The dining saloon will accommodate more passengers than will the dining car of any train.

Under construction, when the long steel girders of the airship were to be seen, it conveyed an impression of strength much like the appearance of an ocean liner in the shipyard. Long before R-100 has reached the present age of the British liner "Mauretania," first class passenger travel will be almost entirely by air.

Persian Balm is a sheer delight to use. Cools and relieves irritations caused by weather conditions. Imparts a rare charm and beauty to the complexion. Fragrant and velvety smooth. Never leaves a vestige of stickiness. Swiftly absorbed by the tissues and stimulates the skin. Persian Balm is the peerless toilet requisite. Every woman will appreciate the subtly distinctive charm achieved by the use of this magical lotion.

Big Tomato Crop

Alberta Farmer To Ship Carload Of Green Tomatoes

Lands which not many years ago were used exclusively for cattle ranching are now producing a large variety of farm crops. The latest development is tomato-raising. One farmer in the Vauxhall District, in Alberta, expects to ship a carload of green tomatoes this season. He will also have about eight carloads of potatoes. These crops were grown on irrigated land. Another farmer has averaged 28 bushels of wheat per acre for nine years.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

A philosopher of the fourteenth century has left it on record that: "Most men have three characters—that which they do exhibit, that which they have, and that which they think they have."

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Extirminator to drive out the parasites.

The Atlas moth, a night flying insect of Central America, is one of the largest insects in the world. Its wings measure 14 inches from tip to tip.

Douglas' Egyptian Liniment is an excellent leg wash for stock. Also removes corns in horses and quickly relieves bruises, sprains, swellings and joint stiffness.

A study looking into causes of street car and bus traffic accidents showed that more than 20 per cent. of the street car and bus operators are "prone-to-accident" men.

Hay Fever

and catarrh are offensive ailments. Heat and inhale Minard's a few times daily, as for colds. It stimulates and relieves the membrane.

SUNDAY SCHOOL LESSON

SEPTEMBER 21

JONAH—THE NARROW NATIONALIST REBUE

Golden Text: "Of a truth I perceive that God is no respecter of persons; but in every nation he that feareth Him, and worketh righteousness, is acceptable to Him."—Acts 10:34, 35.

Lesson: Read the Book of Jonah. Devotional Reading: Psalm 139:7-12.

Explanations and Comments

Jonah's Disobedience, chapters 1 and 2.—"Whenever we are conscious of an urgent voice which says to us, over and over, 'You ought! You ought!' it is likely that we are listening to the word of the Lord. It was thus that the word of the Lord came to Jonah telling him that he ought to go to Nineveh, that great city, and preach there the message that God bade him. Instead of obeying the voice, Jonah went in the opposite direction, the story tells us. At Joppa he found a ship bound for Tarshish (the Phoenician colony on the southern coast of Spain, then regarded as the very end of the earth), and went aboard it. A violent storm arose, the sailors concluded that some one had offended his god, and they cast lots to discover the culprit. The lot fell upon Jonah, who acknowledged his guilt, and advised them to throw him into the sea. Finding the effort to row back to land unavailing, the sailors prayed to Jehovah and then reluctantly cast Jonah overboard. The sea ceased from its raging, and the sailors offered sacrifice to Jehovah. A great fish swallowed Jonah, and after three days cast him out upon dry land.

The Prophet Rebuked, 4:6-11.—Still unwilling to believe in divine mercy, Jonah erected a booth for himself east of Nineveh and sat under its shade to see what would become of the city. The booth was constructed of branches whose leaves withered, but a gourd sprang up and its living leaves afforded him grateful shelter.

The gourd was eaten by a worm, and it withered, and then the srocco from the desert of burning sand blew over him, and he fainted and again prayed that he might die. "It is better for me to die than to live," again he cried. Recall Elijah's wish for death, 1 Kings 19.

"Dost thou well to be angry for the gourd?" said God to Jonah. "I do well to be angry, even unto death," was Jonah's violent retort. His pride as a prophet was hurt, and he was indignant that "heathen Ninevites" should receive mercy from Israel's God. When Job was overwhelmed with afflictions, and was told by his wife to "Renounce God and die," he answered, "What? Shall we receive good at the hand of God, and shall we not receive evil?"

China will have movie censorship.

How To Lose 24 Pounds of Fat

At the Same Time Gain in Physical Vigor and Youthfulness and Swiftly Possess a Clear Skin and Vivacious Eyes that Sparkle with Health.

Here's the recipe that banishes fat and brings into blossom all the natural attractiveness that every woman possesses.

Every morning take one-half teaspoon of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for "it's the daily dose that takes off the fat."—Don't miss a morning. Kruschen daily means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

Modify your diet, and take gentle exercise. The stomach, liver, kidneys and bowels are tuned up, and the pure, fresh blood containing these six salts is carried to every part of the body, and this is followed by "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

An Aviation Mecca

Canada Is World's Best Testing Ground For Aeroplanes

Canada is the world's best testing ground for aeroplanes, as they are given year-round use under varying conditions on wheels, on floats and on skis, said Ernest Robinson, vice-president of the Fairchild Aviation Corporation, in opening the new Canadian factory and aeroplane and seaplane base at Longueuil, Que.

The new plant, which was constructed to turn out Fairchild 'planes for Canadian use, is expected to turn out about 150 Fairchild 'planes a year.

Minard's Liniment is a household friend.

"I never knew until I got a car," said the bishop, "that profanity was so prevalent."

"Do you hear much of it on the road?"

"Why," replied the bishop, "nearly everybody I bump into swears dreadfully."

ENO'S "FRUIT SALT"

Mothers! Don't Risk Their Health With Violent Purgatives

Constipation is one of childhood's greatest enemies. Unless the intestinal system is kept clear and clean ill health is almost sure to follow.

But severe acting laxatives are dangerous. The bodily system of child or adult is not meant to withstand the unnatural, forcing action caused by ordinary, cheap cathartics.

ENO'S "Fruit Salt" in a glass of water, every morning is the safest, surest and most pleasant way to inner cleanliness and perfect health.

CHAPTER XXIX.—Continued

"She can't help having a good time if she lallygags with me," Jim boasted, grinning; but his face grew serious as they reached the sidewalk, and he said: "Buck up, Charmian. You look like a ghost. I don't believe you ate your breakfast. I had a bit of trouble getting mine down, too — kept wondering how you were feeling. Don't cry, please, whatever else you do, or I'll be likely to blubber in sympathy and my reputation as a hard-boiled collector of interest will be in ruins."

"I shan't cry," she promised; and then, after a silence, "It's a big comfort having you along, Jim. I wonder if you know—"

"Know what?" he urged after another pause.

She looked up, her eyes meeting his in a glance that caused his heart to thump so loud that he wondered if she could hear it; but all she said was: "Here we are at the bank, I wonder if my purchaser has arrived."

It took five minutes to get through the greetings of Jim's one-time fellow workers; but when at last they entered George K.'s sanctum, he was alone.

"On time," he said approvingly, with a glance at the clock, "and the deed ready for your signature. No need to delay because your man is—"

When BABIES are Upset

BABY ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea. How would you meet this emergency—tonight? Have you a bottle of Castoria ready?

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria.

CASTORIA**

W. N. U. 1855

"Then there isn't a girl in California, as Miss Lizzie said?"

Jim smiled, thinking how innocent his mother had played into his hands. His arms tightened as he answered: "Lots of 'em, Charmian—real Californian peaches, too; but I seem to be a sort of one-girl man, darling. They simply didn't exist—for me."

She lifted her head at that, her eyes so starry that he felt half-blinded; but, being Jim, he dropped the arms that clasped her and moved away.

"Look here!" he said. "I didn't mean to take advantage of a moment when you're so down and out. I guess I forgot myself; but I had you in my arms, Charmian, and it played the dickens with me. Forget it, dear, till you can see clearly. You mustn't regard me as well—as 'any port in a storm,' you know. I realize that there are a lot of things about me that grate on you. Perhaps time will smooth 'em down; but I want to be fair—"

He stopped abruptly, as if speech came too hard; but Charmian moved closer, looking straight up into his honest eyes.

"I see more clearly than I ever have in all my life, Jim," she said quietly, "and I know now that for me, only one thing really matters; Are—are you sure, absolutely, that you love me?"

Jim smiled. "Haven't I been saying so ever since George K. went out that door?" he asked.

There followed an enchanted interval that was balm of Gilead to Jim's faithful heart. Then the girl said: "We must go home to Grandma. It'll be easier now, telling her about the house. Everything will be easier, Jim. Looking back I see that all our lives you've never failed me in hard moments; and now you've made selling the old house seem bearable. Do you know, dear, I never once glanced at that deed! Even now I haven't an idea who bought the place. Did Uncle George mention it to you?"

"No," answered Jim. "He didn't say a word about it."

And then something, she couldn't have said just what, drew Charmian's eyes to George K.'s old desk and the check, which he'd left lying face up on the shabby blotter.

"How stupid of me!" she cried. "This will tell us, of course. Why? . . . Why, what . . ."

Her voice trailed off into silence as, bending above the desk, she looked down at a signature as familiar as her own. With an unsteady hand she drew the blue slip nearer—then raised her eyes, lips trembling, as she asked: "What does it mean? You! You bought our house, Jim? I don't understand. I—can't—seem. . . ."

"Steady, dear," said Jim, and covered her hand with his. "I couldn't let a stranger buy it, could I? You see, I was afraid the time might come when you'd have to let it go; so when I went West I told Uncle George to keep his eyes open, and make you an offer. I thought when I took Mother away, that it didn't matter much where I was anyhow. I was—positive, that you'd marry the doctor. No," (as she would have spoken), "let me finish, Charmian. I didn't know, you understand, how well the M.D. was fixed financially, and I wanted to make sure you'd have the house. I hadn't doped out just how I'd give it back to you, but I'd found a way. It looked then as if it were the only thing I'd ever be able to do for you, dear—and I wanted to do so much! And then Uncle George wrote that he suspected you'd turned down the doctor, so—well, I thought if I owned the place, you and Grandma could stay right on as caretakers and fix it up, the way you've always wanted to. I even hoped that, as time went on, you'd get to see that the love I had for you might be worth considering."

"And then all of a sudden I couldn't bear it! I knew I'd got to come home and find out where I stood. I got up at midnight and began to cram things into a suit case. Mother looked in the door and called Aunt Sophie. She was under the impression that I'd lost my mind or. . . ."

CANADIAN PACIFIC STEAMSHIPS

As Jim talked he had reached for the newly signed deed and was slowly tearing it into strips under Charmian's fascinated gaze. It was this that caught George K.'s eyes when, after a considerable rattling of the doorknob, which passed unnoticed, he returned to his own domain.

"What in the name of Sam Hill are you doing?" he demanded with a glance at the waste basket into which Jim had dropped the fragments. "Have you backed out of your bargain at this late date?"

"Yep," replied Jim happily, "but I made another—promised to love, honor, and obey, you understand. Sorry to have caused you all this trouble, Uncle George, but it would be rather foolish to have this paper recorded and then, a week or so later, deed the place back to my—my wife. I think you'll agree to that."

The president of the Wickfield National Bank sank slowly into his worn leather chair. "Jim," he announced shaking his gray head, "when it comes to picking out a wife you've got more horse sense than my three boys put together. As for Charmian, it's my opinion that she might do worse, considerably worse. But—"

"Uncle George," broke in Charmian reproachfully, "you said that the man who wanted to buy our house was some one who had driven by and—"

"Well," interrupted the banker with a twinkle, "I don't know any one who's haunted your vicinity more than Jim has!"

"You said," went on Charmian, still reproachful, "that he was going to be married, and—"

"What's wrong with that statement?" demanded George K., smiling. "You haven't the heart to let him vegetate into an old back like Gam Garfield, have you?"

Jim made an unsuccessful effort to suppress a grin, and said: "I'd no idea you were such an accomplished liar, Uncle George; but as I drove you into it I think we'll have to forgive you—that is, if you promise not to let it happen another time."

"Clear out, both of you," commanded George K. briskly. "I'm going home this minute and tell Salina. I'm expecting a man from Portland on the eleven-ten, but he'll have to wait—darned if he won't! I haven't been so happy since I got word that I was a granddad. Run along, I'm in a hurry." Then, as the young folks reached the door he added: "Charmian, haven't you forgotten something, my dear?"

Charmian laughed, came back, and said as the president of the Wickfield National took her in his arms: "I was wondering if you'd let me go this time without a kiss!"

CHAPTER XXX.

It was twilight, and Grandma Davis sat by the window, living over every hour of the day that was drawing to a close. She had been in a sort of blissful daze from that moment when Charmian and Jim Bennett had burst in upon her, the girl sinking down at her knee as she had always done in childhood when there was anything wonderful to tell.

Sometimes it was merely the arrival of the first crocus, or news that the baby bluebirds in the apple tree were trying their wings. Sometimes it was the prospect of an unexpected treat; a coming circus, perhaps, or a Sunday School picnic—but it was here at Grandma's knee that all glad tidings were poured out. Yet, thought the old lady, catching her breath sharply at its beauty, never before had such radiance shone from the girl's face.

(To Be Continued)

Making patchwork quilts was a well-known art in Egypt as far back as 900 B.C.

Picture of Health Now

"In May and June I was badly rundown and had faint spells until it was a drag to do my work. In July and August I didn't seem to pick up so I decided to try Lydia E. Pinkham's Vegetable Compound because I saw it advertised. I took two bottles and now I am the picture of health. I feel fine, do all my work and milk two cows. If any woman writes, I will certainly answer her letter."—Mrs. George R. Gillespie, Punichy, Saskatchewan.

"Freedom of the Press"

The building ablaze—yet the presses ran on—telling the underworld the story of the man who controlled vice and crime—though it cost him his love—he upheld the Freedom of the Press!

TOWN & COUNTY Personalographs

A heavy frost on Monday night did some damage to late gardens in the district.

Aaron Balogh went into Calgary on Tuesday to attend to some business in connection with his new coal mine near Munson.

Const. J. Jones of the Alberta Provincial Police conducted a prisoner to Lethbridge last week.

Mrs. G. L. McFarlane was a Calgary visitor on Tuesday of this week.

Mrs. Evans received word on Saturday that her father had died at Maple Creek, Sask., and she left that evening for the Saskatchewan town.

Mrs. T. J. Ramsay motored to Calgary with friends on Tuesday.

C. H. Nash, R. C. Barr, H. Evans and Norman Nash took in the first day of the hunting season and report game scarce where they were.

Miss Verna Hanna was a Calgary visitor on Tuesday.

Born to Mr. and Mrs. Wm. Hammel on Saturday, September 13th, a son.

Miss Molly Laing left Sunday for Calgary, where she will take her grade 12 this year.

J. M. Ohlhauser and ye editor were duck hunters west of Elnora on Monday and were successful in bagging about 30 fine ducks.

Mrs. Jas. Ramsay, Mabel, Bruce and Jack Spence motored to Calgary on Saturday. Mabel will take her grade 12 in the city this year.

If you are an Elk, don't forget to be at the social gathering this evening. A good time is being arranged.

Eric Robinson was a Calgary visitor on Tuesday and returned that evening.

Happiness is found everywhere, but seldom found anywhere.

ELNORA CREAMERY IS TOTAL LOSS BY FIRE

The Elnora creamery was destroyed by fire recently. This fire is believed to have started from the boiler while the staff was away at dinner at noon and was discovered by them on their return.

The chemical apparatus was soon on the job and the helpers were enabled to save the office equipment and safe; the building and the rest of the machinery were destroyed, the loss being estimated at around \$8,000, partly covered by insurance.

"FREEDOM OF THE PRESS" AT CARBON THEATRE THIS WEEK

The intensely interesting and dramatic atmosphere that is bound up with life on a newspaper has been brought to the screen in the greatest story of journalism ever made. It is entitled "Freedom of the Press" and is a film version of an original screen story by Peter B. Kyne. This picture will show at the Carbon Theatre on Friday and Saturday of this week.

A battle between the cruel forces of the sword and the mighty power of the pen is the dramatic theme upon which the picture is based. The underworld of a big city is the sword and the columns of a large daily newspaper is the pen. Not even the love of the underworld king's ward and the son of the newspaper publisher can bring amity between the two forces before the entire city is rocked by the titanic struggle that finally crushes the outlawed group.

Lewis Stone appears in the starring role of the power behind the underworld. It is the greatest characterization this veteran actor has given and one of the finest portrayals of the year.

An all-star company of supporting players appears in "Freedom of the Press." Marceline Day has the feminine lead. Malcolm McGregor is the son of the newspaper publisher and Henry B. Walthall is the father.

Mr. and Mrs. Len Poxon and Cyril Poxon motored to Calgary on Tuesday. Cyril will remain in the City and will take his grade 12 at the Mount Royal College.

ADVICE TO POTATO GROWERS

Several years ago an old friend of ours advised us never to let potatoes lie undug after September 15th. His advice has been closely followed ever since, without an error. At that, don't put your spuds straight into the cellar. Put them first in pits properly protected for six weeks and then remove them to the cellar. The six weeks' interval gives them time to cure and they save twice as well afterwards. Try it and see.—Exchange

LONGEST GOLF DRIVE IN WORLD

From the ice cornice on the top of Mount Edith Cavell, 11,033 feet high, in Jasper National Park, Leo Bour-

gault, defence man of the New York Rangers hockey team, recently made what is believed to be the longest drive in golfing history. He estimates that the ball, falling 5,000 feet to the Ghost Glacier in the valley below, bounced at least 1000 feet outward off the rocky ledges of the mountain, a total flight of 6000 feet.

CARBON TRADING CO.**Who Does Your Printing?**

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT
